

DynaPulse

2010 Promotion

Special Offers for the DynaPulse-5200A/Pathway Monitor & DAC Noninvasive Hemodynamic Profiling

For a limited time only, we are offering the following to medical professionals and researchers who participate in this new CT-scan screening application scenario for 2010.

A 25% discount will be applied to the Pathway monitoring system, including a 60-day free and unlimited access to the DynaPulse Analysis Center (DAC), with one-year account activation. After expiration of the free trial period, a 50% discount will be applied to the test and report charges for DAC use.

Please contact Amy for more details.
