The all new Bluetooth capable DynaPulse blood pressure monitors.

DynaPulse is pleased to announce the new line of wireless blood pressure monitors. They are packed with DynaPulse same great technology, but allow for the freedom of use that only wireless connectivity can provide.

Bluetooth DP200M/Clinical

Bluetooth DP5200A/Pathway

Since 2008, following the nationwide attention in wireless patient home monitoring, we have been developing the Bluetooth DynaPulse at Preventagen, Inc. This new product is now ready for pre-production.

We are excited to introduce these new wireless solutions for the DynaPulse, and continue to strive to create the best product out there for the health industry.

DynaPulse tirelessly works to improve the management, treatment and prevention of high blood pressure and associated cardiovascular diseases (CVD), and to develop the best and cost effective hypertension care of Tomorrow.
